DAY 5 AND DAY 6 – SATURDAY, 13 JULY 2024 AND SUNDAY, 14 JULY 2024, COLLIER BAY AND HORIZONTAL FALLS

Lying to the east of the Buccaneer Archipelago, the ancient landscapes of Collier Bay have been shaped by massive tidal movements, creating a photographer's paradise. With a tidal range exceeding 14 metres, this movement of water creates unique phenomena. Nestled in the centre of the bay is Montgomery Reef, the world's largest inshore reef system. As the tide falls a raging torrent of water cascades off the top of the reef, creating turbulent 'rivers' and mini waterfalls. At the Southern end of the Bay, Talbot Bay is home to the world's only 'Horizontal Falls', described by Sir David Attenborough as "One of the greatest wonders of

COASTAL QUEST

the natural world.” Hidden in the many caves and grottos of this ancient landscape are a multitude of ancient rock art galleries. Activities here will be determined by the weather and tide conditions. (B,L,D)

DAY 7 – MONDAY, 15 JULY 2024, CAREENING BAY

Careening Bay was named by Lieutenant Phillip Parker King after his ship, HMC Mermaid, was careened there during his third voyage of discovery in 1820. At a high tide, on a warm September afternoon, King ran the leaking Mermaid onto the sands. As the crew worked hard to re-float the vessel, the ship’s carpenter carved the name of the vessel and the year into a conspicuous boob tree. The boob tree is now three metres wide and National Heritage listed. (B,L,D)

DAY 8 – TUESDAY, 16 JULY 2024, HUNTER RIVER

Arguably one of the most scenic parts of the Kimberley coast, Prince Frederick Harbour and the Hunter River are lined with pockets of ancient rainforest, pristine mangroves and mosaic sandstone cliffs. The sandstone escarpment at the river mouth, known as “Kampamantiya” rises over 200 metres high before giving way to extensive mud banks and mangrove forests home to numerous bird species and the saltwater crocodile. The Expedition Team will share their knowledge as you explore by Zodiac, keeping a lookout for wildlife. You will also have the opportunity to reach the Mitchell Falls by helicopter from Naturalist Island beach. (B,L,D)

DAY 9 – WEDNESDAY, 17 JULY 2024, SWIFT BAY

The Bonaparte Archipelago consists of a rugged maze of islands stretching almost 150kms along Western Australia's coast. Its remote location has ensured it remains a remarkably pristine location to explore and experience. The ‘T’ shaped bay is composed of heavily fractured sandstone providing an abundance of rock shelters. On the walls of these shelters are examples of Wandjina and Gwion Gwion style rock art. Join your Expedition Team ashore for a guided walk to a number of rock art galleries depicting these unique rock art styles. (B,L,D)

DAY 10 – THURSDAY, 18 JULY 2024, VANSITTART BAY

Jar Island contains ancient rock art galleries depicting the Gwion Gwion style unique to the Kimberley region. Gwion Gwion art may extend back to over 30,000 years before our time and represents the first wave of seagoing colonisers of the Australian continent. As it is, these are the oldest detailed depiction of human figures in the world. Join your

Expedition Team ashore for a short walk, past some fascinating rock formations, to the site of the Gwion Gwion art galleries. (B,L,D)

DAY 11 – FRIDAY, 19 JULY 2024, KING GEORGE RIVER

The colours and textures change with the light creating a continually changing vista that is simply stunning. Your Expedition Team will escort you to the foot of the twin falls and explain the stunning geological formations of the canyon. (B,L,D)
